

RVP30

VERSATILE FILLING AND SCREWING MACHINE | BOTTLES & JARS

The RVP30 Premium is a standard machine, simple to use all the while being very robust. It combines the different functions of dust removal, filling with or without rotation of the containers, placing and screwing on the same turntable. Capable of filling a multitude of products: jars, bottles, AIRLESS bottles; for a wide range of viscosities: water, lotion, gel, cream. This filling machine is currently the most versatile on the market.

FEATURES

Rate: up to 30 pcs/min
Filling capacity: 1 to 1000ml
Dosing accuracy: +/- 0.1%
Product height: up to 275mm
Product diameter: up to Ø110mm
Dimensions: 2250x1200x2100mm.

BENEFITS

Easy & intuitive use.
Rapid format changeover.
SMED tool system.
BRUSHLESS technology on all axes with HMI design.
Upgradable and adaptable.

OPTIONS

Vacuum filling.
Vacuum snapping.
Crimping.
Air blowing top.
Heat-sealing module.
Ejection module.
